

Contarnex Europe Limited

Slave Clocks with plastic housing - indoor operation by master clock

- Sizes \varnothing 230, 300 and 400 mm.
- Housing ABS-plastic, in white, light grey or brown.
White = NCS -0602-G47Y, light grey = NCS -S2502-Y, brown = NCS 8010-Y50R.
- Black numerals or hour marks on white background. Black hours- and minutes hand. Convex protection glass.
- Single sided, depth of housing 37 mm., for surface mounting.
Fixing to wall or ceiling (hanging) also possible by additional bracket.
- For double sided installation two clocks and one bracket are used.
- Clocks with only hours- and minutes hand are operated by 24 V polarised 1/1- or 1/2-min.impulses from master clock.
- Clocks with stepping seconds hand (red)-almost soundless by oil damper - are operated by 24 V polarised 1/1-sec. impulses from master clock.

Further models are described in separate brochures.

Brackets (wall/ceiling)

- for double sided installation or single sided together with a back side cover.
- of anodised aluminium with adjustable arm for setting of the distance to wall or ceiling.
